

# Staff & Family Survey Results

---

SCHOOL REOPENING MODEL PREFERENCE

*July 23, 2020*

# Methodology

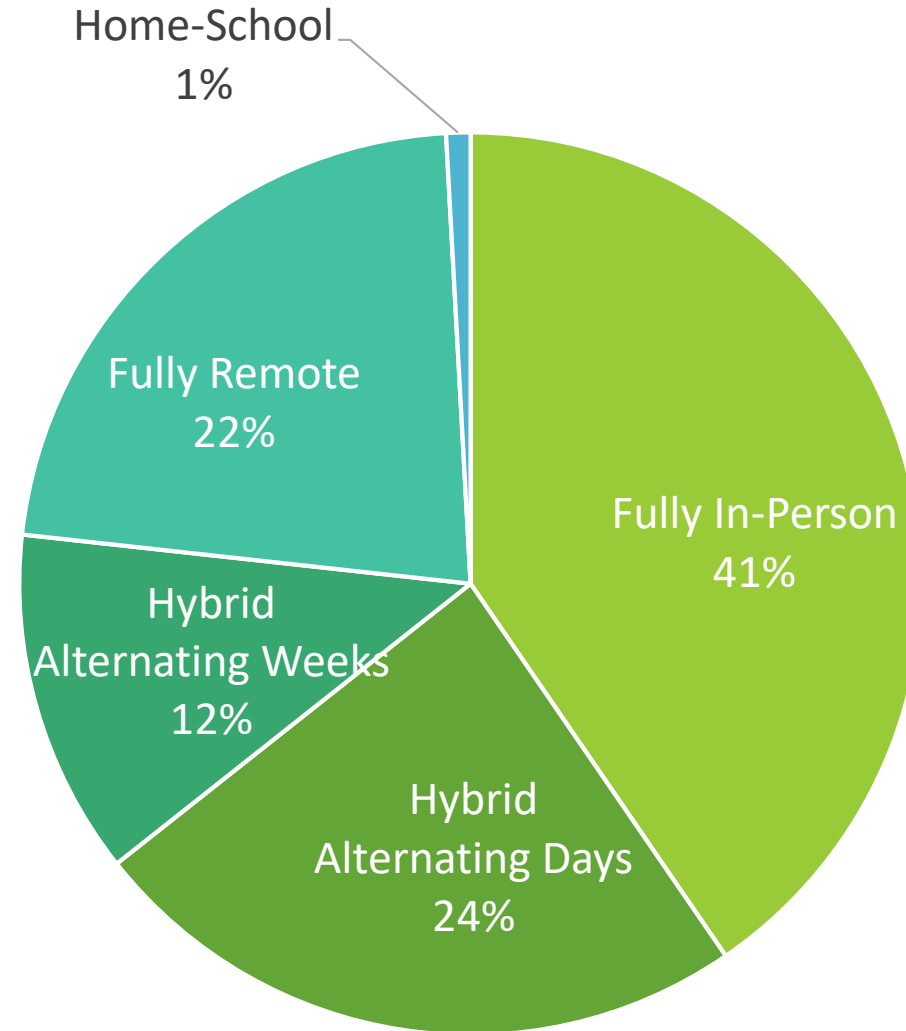

---

Surveys were distributed the week of July 13<sup>th</sup> to families (1,529 responses representing 2,303 students) through the district update. Staff (514 responses) received an email from the HR Department. A second round of family outreach included email communication, principal outreach, and phone calls notifying families to take the survey. These chosen methods of outreach are consistent with parent/guardian feedback in a June survey where 60% indicated one of these methods as most preferred way to receive communications.

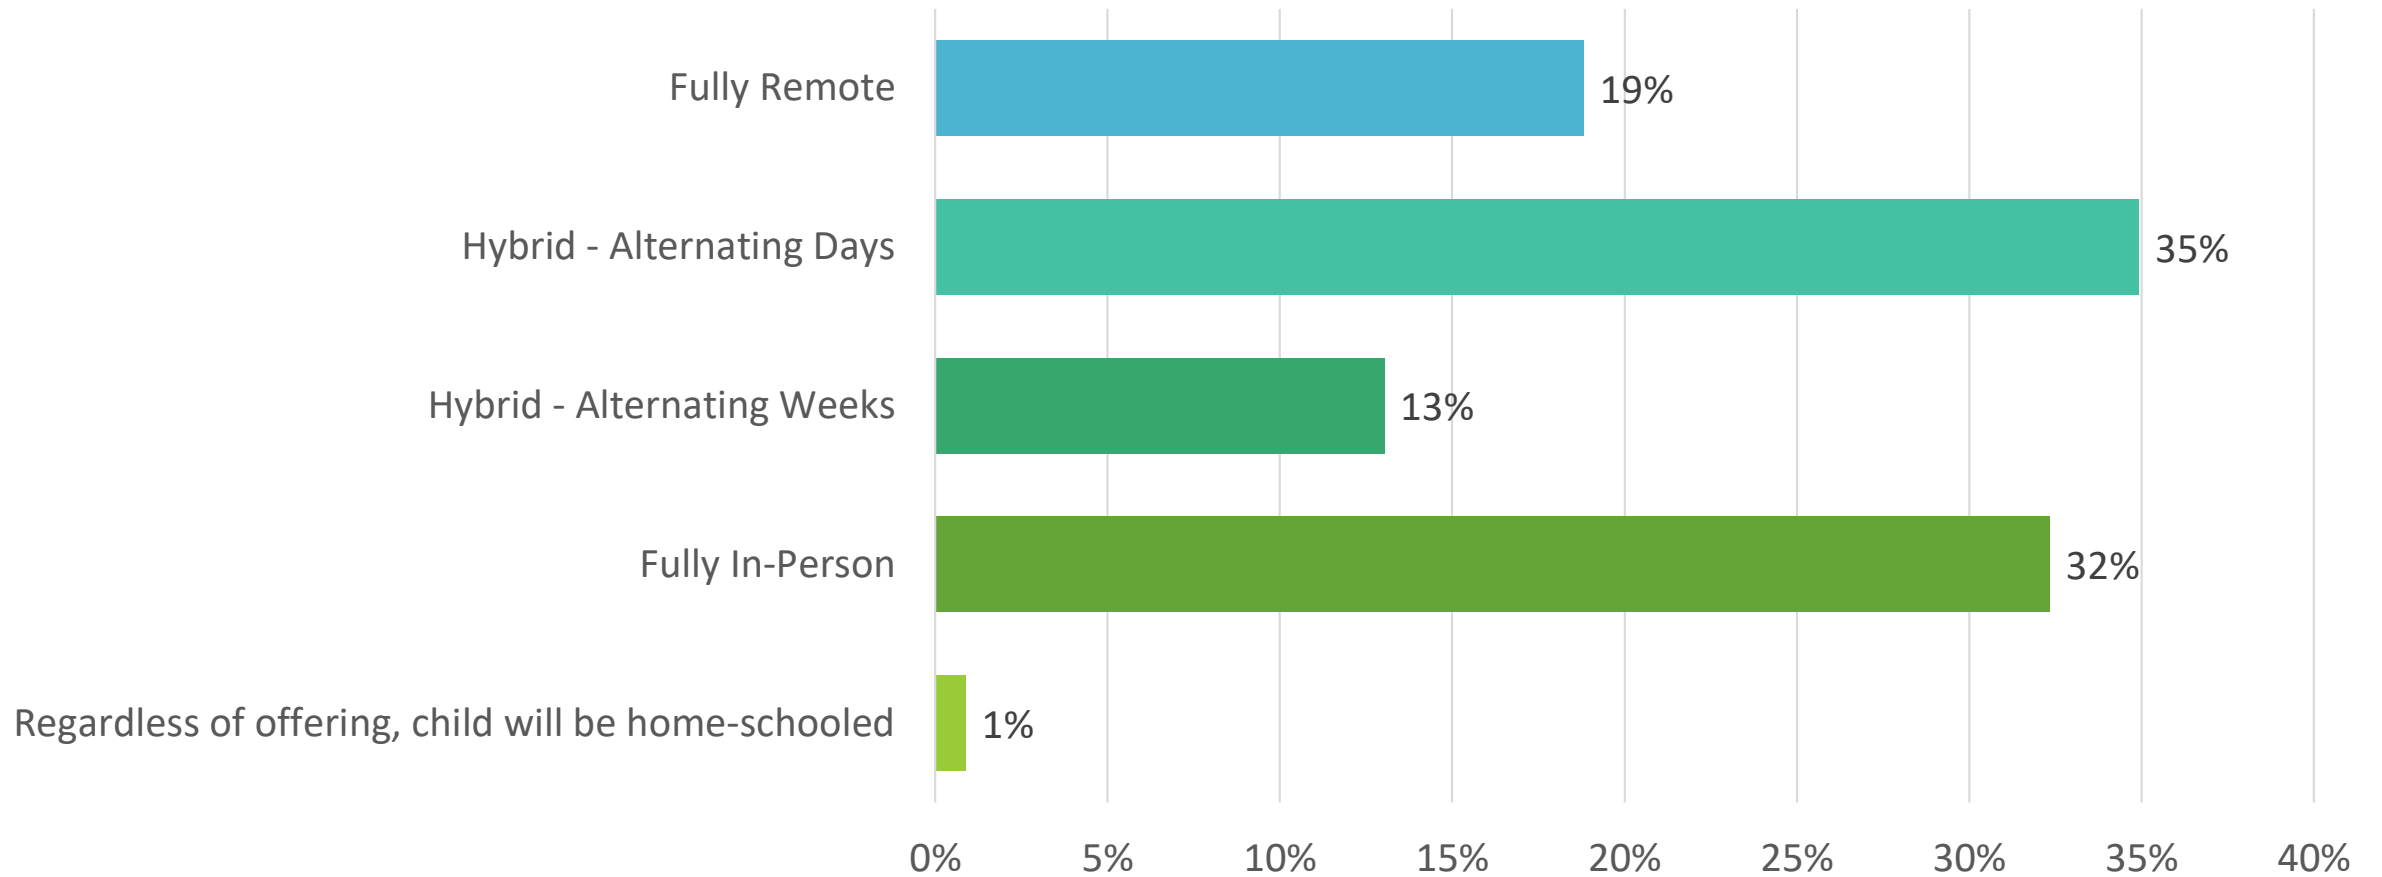

The family survey was distributed in the 4 target languages of English, Spanish, Portuguese, and Haitian Creole. Two hundred twenty responses were received in a language other than English.

Results from the June family survey provide important context and are available at:
