Sharewood Project

A Free Healthcare Organization

The Sharewood Project offers free, healthcare services to individuals and families in need of accessible health care. Services include clinical, case management, laboratory, and other types of health care. All services are open to everyone, including the uninsured, and no appointment is necessary.

Sharewood is run by volunteer medical students and physicians affiliated with Tufts University School of Medicine and Cambridge Health Alliance, with help from other health professional students and translators from Tufts University.

Unfortunately, due to the limited resources of the Sharewood Project we are only able to accommodate physicals for uninsured individuals under the age of 18. We apologize for any inconvenience.
